### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Jayarman et al. (patent #6,145,551)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Jayarman et al. disclose a garment for monitoring a patient's vital signs comprising a comfort component and an information infrastructure component

Art Unit: 3739

integrated therewith. At least one interface (55) provides a transmission path between the information infrastructure component and an external device. The comfort component is disclosed as possibly being fibers of cotton. As seen in figure 5, there is disclosed metallic fibers. The comfort component is disclosed as being from the group consisting of tubular woven and knitted fabrics.

Jayarman et al. further specifically disclose that the garment can be used for measuring vital signs and more specifically cardio respiratory function.

There is further disclosed a system of optical fibers used in order to form a penetration detection component.

### ***Response to Arguments***

It is the examiner's position that current claims 1-33 of this application are "structurally" anticipated by the reference of Jayaraman et al. (patent #6,145,551). That is, the claim limitations recited in current claims 1-33 describe elements which are structurally identical to elements disclosed in earlier patent #6,145,551. It is noted for the record however that the two disclosures use significantly different nomenclature, which will have a bearing on whether the claims of the current application can be said to be supported under 35 U.S.C. 112 by the earlier patent application.

Reference is made to section 706.02 of the M.P.E.P. which states in relevant part "If the application is a continuation-in-part of an earlier U.S. application, any claims in the new application not supported by the specification and claims of the parent application have an effective filing date equal to the filing date of the new application.

Any claims which are fully supported under 35 U.S.C. 112 by the earlier parent application have the effective filing date of that earlier parent application."

It is noted that patent #6,145,551 nowhere uses the specific nomenclature "information infrastructure component" which is found in current claim 13. This creates a situation where the reference of Jayaraman et al. (patent #6,145,551) "structurally" anticipates the currently recited claim limitations, however at the same time, those same claim limitations cannot be said to be fully supported under 35 U.S.C. 112 by the earlier patent application.

### ***Conclusion***

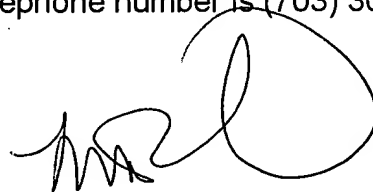

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
